ADANA®

Genuine High Definition Rubber Inking Rollers

Our new HD rubber rollers bring the durability and definition of commercially made rollers that are used on big presses, to the small printer! Now available for all known Adana models still in use, these rollers will give years of sharp crisp images without breaking down, swelling or melting. After use a quick clean with white spirit is all that is needed to restore them to their original condition. Accurate two level Nylon runners complete with locking screws are also available for each size roller. We also supply rubber rollers for other platen presses - please ask for details.
