- ◆ Die cut, kiss cut, score and perforate in one pass
- ◆ Flexible dies for custom shaped products
- ◆ 4500 sheets per Hour
- ◆ Top sheet, air suction, deep pile feeder
- ◆ Simple and quick die changeover
- ◆ Sheet separator

The RDC Rotary Die Cutter has been designed to meet the demands of today's digital print market catering for short run, medium run and long run custom shaped print products.

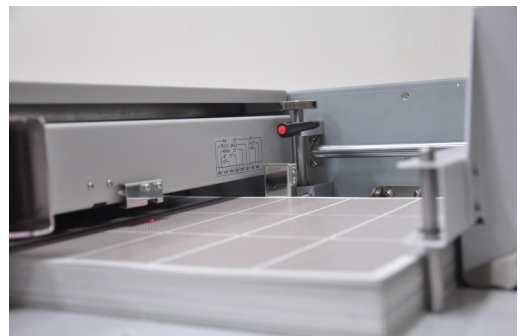

Using the latest technology flexible dies any size, shape and format can be quickly and easily produced from a single sheet.

The RDC Rotary Die Cutter can die cut, kiss cut, score and perforate in a single pass on stocks ranging from 120gsm to 400gsm. Products that can be produced include labels, greeting cards, business cards, postcards, event tickets, stationery, playing cards, folded boxes and retail packages.

Using a top sheet air feed system, deep pile feeder and double sheet detector the RDC Rotary Die Cutter reduces the problems which can occur with today's demanding digital outputs!

Accuracy of the final product can be controlled by working from either the lead edge or a printed registration mark.

The RDC Rotary Die Cutter is based around a simple, user friendly 8 inch touch screen that has various setting adjustments for fine tuning the die location to the image as well as adjustments for for waste separation, job changes and storage.

Accuracy of the final product can be controlled by working from either the lead edge or a printed registration mark and the side alignment tray ensures accuracy is repeated every time.

And with a very impressive running speed of 4,500 sheets per the hour there is no other rotary die cutter on the market with such an impressive specification at such a competitive price!

The RDC rotary die cutter can be supplied with or without the sheet separator which can be added at a later date if required.

## *Specifications*
