The Sunraise HP Series is the preferred choice for customers looking for high production capability and energy efficient, cost productive operation.

The HP Series represents the entry-level for automatic thermography machines with features not normally found on a machine at this price level.

All of the HP Series models feature the triple section, state-of-the-art ceramic fibre heaters complete with Heat Zone Control. This allows the operator to shutdown the outside heaters when running smaller jobs thereby reducing wattage by up to 44%. To further save energy and maintain the ambient temperature on the outside, the heater tunnels are insulated with the same high-tech insulation used by NASA on its spacecraft.

Specifications

Model	Length	Width	Height	Weight	Power	Max stock	Wattage
HP12	411cms	89cms	140cms	453 Kgs	415v/45A	30cms	10,200
HP15	518cms	96cms	145cms	544 Kgs	415v/60A	38cms	12,000
HP20	579cms	109cms	145cms	635 Kgs	415v/75A	51cms	22,400
