

Punch-Tech - Five Holes Across with Punches 1 & 3 Activated

Adjusting product size range by activating/deactivating punches and programming punch position.

In this example....

12" wide paper

Punch assembly with .125" diameter holes, five across on 2.25" centers.

Note: Punches 1 and 5 are "On". Punches 2, 3 and 4 are "Off".

Can be used to hole punch two across tags up to 4.875" wide with .25" gutters.

Hole punch positions down the length of the sheet are programmable to match tag size.

After hole punching, the product profile is created using a guillotine cutter, die cutter or a cutter/slitter.
