The SEA SuperEtch is a truly unique product.

Etch Copper Plates quickly and easily in house as required

No other Etching System provides this level of productivity, flexibility and efficiency

The Model SEA Super-Etch Etching Machine is an upgraded Tru-Etch Machine which Cronite has been making since 1951. It is the best all around small etching machine at an incredibly low price. The best features of every etching machine ever made have gone into its design, giving the best controllable product at an affordable price.

It will automatically etch with a spray head, within sizes up to 406 x 406mm (16" x 16"), or 305 x 305mm (12" x 12") with the optional rotary work holder.

A digital cycle timer, digital temperature controller, 600 watt heater, observation window, safety interlock, low level alarm, cooling coil, hydrometer port and a rinse tank are all standard features. Available as options are a chiller, exhaust hood and blower, fume scrubber, neutralizer and rinse water evaporator, rotating work holder and an oscillating spray head system.

The Super-Etch is built with almost all pre-drilled holes to accept any option at a later date. Just like to-days computers, buy what you need today and upgrade later if necessary. It is the best all around small etching machine at an incredibly low price. The best features of every etching machine ever made have gone into its design, giving the best controllable product at an affordable price.
